ACTIVITY 11

Environmental Protection for Sustainable Development

Based on the video clip you watched, answer the following:

Name of the Organization:

Buklod Tao Inc.

Environmental Project/ Program:

- **Disaster risk reduction and emergency response**
- **Community training and education**
- **Environmental protection**
- **Sustainable livelihoods**

Salient Aspects of the Project:

Disaster risk reduction and emergency response

- **The organization form a rescue groups, builds rescue boat and equipments like life vests. The rescue groups are tend for searching and reminding local communities on what to do during calamities.**

Community training and education

- **The organization aims to tell the community the importance of environmental protection. In addition, they implement education for the community about the preparation and the things to do.**

Environmental protection

- **The organization really care for the environment. They start from recycling plastics and tree planting. Also, the rescue boats are made from fiber glass to avoid the cutting of trees.**

Sustainable livelihoods

- **The organization aims to improve the life of families in the community for example, making of bags or wallets from the juice packs and wrappers. Minimizing the poverty suffered by the community significantly makes a fast recovery after the calamities.**

If you will become a volunteer of the said organization, what will be your contributions to the group?

- **If I am a part of Buklod Tao Inc., the things that I can do to help the organization is simply by promoting the projects and programs to everyone. House to house visitation, sharing the knowledge about the importance of the environment, advocating the mission and vision of the organization, be one of the foundation to surpass all the trials will encounter in the future and lastly, learn to live with their purpose.**

Name of the Organization:

Angat Kabataan

Environmental Project/ Program:

- **Restoration of dying Maningning Creek**
- **Bamboo Planting**
- **Production of Bokashi balls**

Salient Aspects of the Project:

Restoration of dying Maningning Creek

- **The volunteers including the residents nearby the creek help to clean and rehabilitate the said creek.**

Bamboo planting

- **Bamboos will serve as the holder of the soil to prevent the weathering of the soil at the creek sides.**

Production of Bokashi balls

- **The bokashi balls help the creek to remove the bad smell of the water as well as to make it more cleaner and clearer.**

If you will become a volunteer of the said organization, what will be your contributions to the group?

- **If I will become a volunteer in this organization, im going to influence more and more youths to be part of the said organization. Not only to be part, but also they must apply goals of Angat kabataan on preserving the bodies water like creeks. They gave importance and value to the cleanliness of the environment. Im going to make every youth that they must be the model of their own community on how to make their place a more safe to everyone.**
